EXECUTIVE COMMITTEE OF THE  
FRIENDS OF THE ARMY MEDICAL LIBRARY  
Washington, D. C.

### GRANDFATHER'S BIG BIBLE

When my grandfather closed his eyes and committed his soul to the God he firmly believed in, just after the opening of the Spanish American War, he had lived under every president of the United States save Washington and Adams. As a child he had seen something of our second conflict with England, but he was too old to indulge in the Mexican adventure and he was in his sixties when the Civil War closed. Now in his middle nineties, dag nab it, another war was in progress| Grandfather's father had been a Revolutionary soldier at sixteen and his grandfather had commanded a company at Bunker Hill under General Reed. He could not suspect then, that the grandson who held his hand was to see active service in the Philippine Insurrection, in Mexico, and in France during the World War. If he could have foreseen this adherence to the service of Mars even unto the fifth generation, it is doubtful if he would have been displeased.

Although he was a patriot, my grandfather had never believed in war as a means of securing justice. He seemed resigned, though, to its inevitability and did not cry out against it for he was never a man to indulge in futile talk. He was in the hardware business in a humble way, to be sure, but had he been a steelmaster, making armor plate and cannon, I suppose he would have felt the same, because in those days your business was frequently predetermined and it was generally a lifetime work, perhaps several lifetimes, if it had been handed down to you.

The old gentleman had always read the Bible every day of his life, but when he was eighty or thereabouts, his eyes began to fail and his doctor told him he would have to do less reading. Inasmuch as he never read anything but Holy Writ and the Boston Transcript, he declined to listen to such advice and set about to get a "bigger Bible," as he put it. He got a bigger Bible every couple of years thereafter as his eyesight continued to weaken, the last one consisting of some six volumes of New and Old Testament with the print half an inch tall. So he read to the very end, laughing at the doctor for his useless suggestion. Give up reading the Bible? Not he!

(See inside back cover)

---

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is \$5.00 per year in the United States and \$5.50 per year in other countries. The Recent Book Acquisitions may be obtained separately at \$1.00 per year. # I. Anatomy, Embryology, Morphology

Arch. pat. anat., Moskva, 1941, 7:

- DOROVSKY, M.L. The nervous system in autotransplantation of the thyroid gland. No.2, 3-22.  
 POLONSKY, I.V. Pathogenesis of symmetrical ulceration of the tongue. No.2, 23-7.  
 FILIPPOV, V.V. Dynamics of structural reconstruction of the mucous membrane of the stomach cancer. No.2, 28-43.  
 RAPOPORT, J.L. Erythematous chronicsepsis; so-called acute disseminated lupus erythematosus. No.2, 44-62.  
 BLOCH, M.I. On arterio-venous anastomoses. No.2, 63-8.  
 DAVYDOVSKY, I.V. Pathological histology and pathogenesis of acute lupus erythematosus. No.2, 69-81.  
 ZEITLENOK, M.A. Pathogenesis of cerebrospinal meningitis; variability of the permeable hemato-encephalic barrier in hyperergic state of the meninges. No.2, 82-92.  
 MARUKHES, T.E. On the open oval orifice in the intra-auricular septum. No.2, 93-102.  
 TKACHENKO, I.O. Pelvis inversa, its structural and causal genesis. No. 2, 103-5.  
 CHARNY, A.M., & LAFTOVA, N.N. On hyperlactacidemia in state of toxic shock. No. 2, 109-13.  
 AGILNITSKY, V.N., LEPSKAYA, M.V., & GOLDBERG, A.F. Chemical-morphological parallels in Arthus' phenomenon. No.2, 114-18.  
 GOLYSHEVA, K.P. Effect of electric ultra-high frequency on temperature reaction and glycogen content of the denervated liver in cats. No.2, 119-22.  
 GOLDBINA, V.G. On Sturge-Weber disease. No.2, 123-7.  
 URANOVA, E.V. On pathological anatomy of myasthenia gravis. No. 2, 128-32.

## 2. Anthropology, Ethnology

Zschr. Rassenphysiol., 1941, 12:

- DAHN, P. Serologische Untersuchungen bei 330 Zwillingspaaren. 1-17.  
 RICHTER, J. Die Blutgenverteilung in Hannover. 18-27.  
 KREKHOFF, H. Blutgruppenuntersuchungen in einem Eifelort; ein Beitrag zur Frage der Vererbung der Blutigenschaften ABO und MN und zur ihrer Verteilung in der Bevölkerung. 28-50.  
 JANKOWSKY, W. Zur Frage der Haarfarben und Haarpigmente. 51-8.  
 MULLER, R.F.G. Eine Konstitutionslehre der altindischen Medizin. 59-72.

## 4. Biology

Arch. biol. nauk., 1941, 62:

- VISHNEVSKY, A.V. Author's methods in treatment of wounds. 3-11.  
 KHODORKOV, F.A. Results from application of oil-balsam dressing in various hospitals. 12-14.  
 KUKIN, N.N. Treatment of gunshot wounds complicated by anaerobic infection. 15-20.  
 KUKIN, N.N. Treatment of frost-bite of the extremities by novocain block and oil balsam dressing. 21-7.  
 FEDOROV, D.N., & KOROVIN, A.S. Treatment of gunshot wounds and frost bite in evacuation hospitals with ointment dressing. 28-33.

- PSHENICHNIKOV, V.I. Gun shot wounds of the abdomen during military operations. 34-8.  
 OSIPOVSKY, V.M. Treatment of infected wounds with oil-balsam dressing according to Vishnevsky. 39-45.  
 ZAKHARIAN, S.T. Novocain lumbar block shock following blood transfusion. 46-9.  
 MANEVICH, A.A. Sheath anesthesia in reduction of fractures of the fore-arm. 50-2.  
 OSIPOV, B.K. Spread of tight infiltrate in operations of the long tubular bones; anatomical-clinical data. 53-61.  
 PALATNIK, S.A. Principle methodological problems in Pavlov's theory of the higher nervous activity and modern physiological idealism. 70-86.

Biull. eksp. biol. med., 1941, 11:

- KUDRIASHOV, B.A., ULITINA, P.D., & PUGACHEVA, A.A. Effect of vitamin K on the concentration of prothrombin in the blood. 99-101.  
 MISHCHENKO, I.P., & LEDANOV, S.N. Endogenous and cancerogenous substances in the organs of cancer patients. 102-4.  
 LOZINSKY, D.A., & MARKUZE, K.P. Effect of Arthus' phenomenon on the course of experimental cancer. 105.  
 GOLDBERG, A.F., & LEPSKAYA, M.V. Chemical deviations in sensibilization of animals with experimental cancer. 107-10.  
 DOMONTOVICH, E.M. Effect of low barometric pressure on experimental anaphylaxis. 111.  
 POTAPOV, I.I. Hematogenous tuberculosis of the middle ear under experimental conditions. 113.  
 CHARNY, A.M., SYRKINA, P.E., & KRASOVITSKAYA, S.E. Water metabolism in the pathogenesis of toxic shock. 115-8.  
 GUINNESS, S.G., CHARNAYA, P.M., & IAKUSHEVA, T.S. Effect of insulin on excretion of sugar and retention of lactic acid by the liver. 119-23.  
 GENKIN, A.M. Cadmium as a reagent for sedimentation of accumulated reduction substances in determination of blood glycogen. 124-6.  
 BURACHEVSKY, I.I. Effect of pituitrin and hypophysectomy on gastric secretion in dogs. 127-30.  
 TITAEV, A.A. Effect of acids and salts on the absorption of pectones and simultaneous changes of the intestinal potential. 131-4.  
 ZENIN, B.A. Innervation of the ventricle of the frog heart. 135.  
 ANDREEV, S.V., BORISOVA, E.I., & RUSINOV, V.S. On the multiple centers in auricular fibrillation. 137-9.  
 VADIMOVA, M.A., & POPOV, N.A. Effect of local cooling off of the skin with water on the activity of the heart in the rabbit. 140-3.  
 GONCHAROV, P.P. Variability of respiration and blood circulation in visceral reflexes from the intestines. 144-6.  
 KONIKOV, A.L. Effect of nerve changes on the pessimum of duration of a single stimulus. 147-9.  
 MARGOLIN, G.M. On autosecondary excitation. 150-2.  
 DOBRIAKOVA, O.A. Effect of the center of the retina on its periphery. 152.  
 IUNIEV, G.S., & SELIANINOVA, A.M. Nature of cortical motor reaction; effect of anesthesia on the rate of the conductivity of stimuli in the spinal cord. 153-6.  
 KOVALSKY, P.A. Experimental investigations on segmental innervation of the skin of the fingers. 157-9.  
 KRAVKOV, S.V., & NIKIFOROVA, O.I. Increase of sensibility of peripheral vision by means of preliminary illumination of the eye with red light. 160.

- ZARETSKAIA, R.B. Effect of illumination of one eye with white light on the intraocular pressure of the other. 164.
- ZARETSKAIA, R.B. Reaction of intraocular pressure of normal and glaucomatous eyes to unilateral excitation with red and green light. 166-8.
- LEVINA, L.S., & FRADKIN, M.I. Change of conditioned reflex of the intraocular. 169.
- RUBEL, V.A. Effect of certain vegetative poisons on the excitability of the cornea. 171.
- BULYGIN, I.A. Cortical regulation of the movements of the stomach and cortical reception of its impulses following removal of the premotor zone. 173-6.
- MOGENDOVICH, N.R. On intrareceptive effects on the skeletal musculature; effect of mechanical and chemical stimuli of the internal organs on the motor chronaxia. 177-81.
- MOGENDOVICH, N.R. On intrareceptive effects on the skeletal musculature; effect of full stomach, temperature of its stimuli and partaking of food on the chronaxia of skeletal musculature. 182-5.
- FEDOTOV, T.S. Conditioned reflexes in dogs, resuscitated after clinical death by blood-letting. 186-9.
- PETRIAEV, E.D., & SEROV, S.I. Peculiarities of the pharmacological action of ascorbic acid. 190-2.
- LEVKOVICH, E.N. Pathogenesis of tick spring-summer encephalitis; distribution of the virus of tick spring-summer encephalitis in the human body. 195.
- LEVKOVICH, E.N., DROBYSHEVSKAIA, A.I. ET AL. Virus characteristics of isolated outbreaks of tick spring-summer encephalitis. 197.
- LEVKOVICH, E.N., & KAGAN, N.V. Experiments in obtaining specific (immune) serums from animals in tick spring-summer encephalitis. 199.
- MALEVICH, I.I. Resistance of mice and rats to repeated infection by larvae. 201-4.
- MASHTALER, G.A. Experimental sleep in birds in low temperatures. 205-7.
- MASHTALER, G.A., & KHOROSANOVA, A.K. Experimental sleep in mammals in low temperatures. 208-10.
- PLETNEV, A.V., & POTAPOVA, I.T. Hunger, appetite and satiation (food reflexes and food behaviour). 211-4.
- STEFANTSOV, V.D., DMITRIEV, V.D., & KARAMIAN, A.I. Effect of excitation of the cerebellum with nicotine on the excitability of the cervical sympathetic nerve. 215-7.
- MAKAROV, P.O. Investigation of pain reaction in man at microintervals. 218-20.
- HOLBERT, S.N. Dynamic chronaxia of the parabolic nerve. 221-5.
- SAKHAROVA, O.S. Changes of rhythmic tactile sensations in pain excitation. 226.
- TARUSOV, B.N. Comparison of the measurements of electroconductability of various tissues. 228.
- MICHELSON, M.I. Effect of certain narcotics on the sensibility of the muscle of the leech to acetylcholine. 230-3.
- FILIPPOVA, A.G., & KORENEVSKAIA, O.G. Comparative investigations on the content of acetylcholine in the nonmedullated nerve of the Anodonta and the medullated nerves in vertebrates. 234-7.
- RASPOPOVA, N.A. Effect of the anode of constant current on the content of acetylcholine in the brain. 238-40.
- POGACHEV, A.G. Effect of calcium ions on the formation of acetylcholine in the central nervous system. 241-3.
- ALEKSEEV, N.A. Dynamic chronaxia of the cutaneous receptors in man. 244-7.
- BARADZHANIAN, M.G. Effect of rhythm in over-exertion on the changes of muscular chronaxy. 248-51.
- DMITRIEV, V.D. Effect of conditioned reflexes on the variability of motor chronaxia during excitation of the olfactory receptor in the dog. 252-4.
- SINITSYN, M.P. Method of grafting an accessory heart to the frog. 255.
- LOKSHINA, E.S. Effect of light on the biological properties of the blood and cerebrospinal fluid in relation to the rhythm of waking and sleep (activity and rest). 257-60.
- PROKOPENKO, N.E. Phytotoxic properties of metabolites of normal and tuberculous lungs. 261-4.
- KATZNELSON, Z.S. Effect of lithia salts on the structure and separation of embryonal nuclei of the tissues. 265-7.
- ESKIN, I.A. Effect of adrenalin on the gonadotropic secretion of the pituitary gland of the rat. 268-70.
- PROBIAZHENSKY, A.P. Variability of the gonadotropic function of the pituitary gland in Basedow's disease. 271-3.
- EMELIANOVA, E.N. Certain data on the nature of the effect of bromide on the thyroid gland. 274-7.
- EMILIANOVA, E.N. Conditions and nature of pigment formation in native, and chinchilla rabbits. 278-80.
- RIVOSH, F.I. Metabolism of dehydro-ascorbic acid in the organs of the rabbit. 281-4.
- PETROVA, A.N. Increased resistance in mice to phosphorus poisoning by injections of products of enzyme hydrolysis of the liver. 285-7.
- KLINENKO, V.G. Sulphur extracted from the white and red muscles. 288-90.
- GLAZOV, V.A., & PETROV, F.P. Effect of insulin on the nervous system. 291-3.

#### REDUCTION IN PRICE OF MICROFILMS

In the report to The Friends of the Army Medical Library, published in the July 2nd number of the Current List, it was mentioned that, due to economical organization and greatly increased number of orders, the unit charge for microfilm copying was being reduced from 30 to 25 cents. This is now in effect and it is hoped it will cause many more persons to take advantage of Medicofilm Service for securing copies of the source literature required by them in studies of medical problems.

It may be mentioned that the economies referred to are in great part the result of a policy of having the work done on the piece basis by library employees, outside of regular hours. They are paid for the number of orders filled and are directly interested in receiving and executing them as promptly as possible. It relieves Medicofilm Service of the obligation and risk incident to paying fixed salaries and stimulates employees of the Library to a greater personal interest in seeing its resources made available to persons at a distance. It is hoped that future reductions in prices will be possible and that many more of those engaged in research will be encouraged thereby to use this economical and efficient means of obtaining the source literature of medicine.
